EDITORES

PRAEFATIO.

Iterarium Romani orbis, Antonini imperatoris nomine inscriptum, quo tempore conditum sit inter eruditos ambigitur. quod vulgo credunt, quattuor viros ab Aethico commemoratos itinera dimensos esse, id nusquam traditum est. auctor est Aethicus, vel quicumque sub eius nomine latet, Iulio Caesare et Marco Antonio consulibus a Nicodexo orientem, occidentem a Didymo, septentrionem a Theodoto, a Polycleto meridianam partem mensurari coeptam; omniq[ue] orbe terrae sic a dimensoribus per multos annos peragrato, de eius continentia perlatum esse ad senatum^{*)}. sub idem tempus ortae videntur mensurae quas passim ex M. Vipsanii Agrippae commentariis in Naturali Historia C. Plinius Secundus affert. verum eae ad longitudinem et latitudinem provinciarum spectant, non ad urbium intervalla nec ad ipsos itinerum anfractus. easdem terrarum mensuras a missis Theodosii emendatas esse perhibet saeculi noni scriptor Dicuil, cuius in libro ad eorum auctoritatem composito non urbium distantiae sed terrarum spatia exponuntur. „Theodosius” (sic ille) „praecepit suis missis provincias orbis terrae in longitudinem et latitudinem mensurari.”

^{*)} Quattuor illa mensurorum nomina, etsi varie scripta, leguntur in melioribus Aethici codicibus, quos in futurum usum excerpimus; inde sumpta in Chronico Ovetano sive Albeldensi edita sunt ab Henrico Florez in España Sagrada T. XIII p. 433 (ed. 2, Madrid 1782. 4°). eadem in vetustissimo libro Vindobonensi, nostro *L*, legi Endlicherus docuit, Catalogi pagina 230 (Vindob. 1836. 4°); quo cum codice consentit recentior Vindobonensis Suppl. 14. corruptior est Vaticanus 3864, ex quo eadem nuper vulgavit Fr. Ritschellius Mus. Rhen. philol. 1842 p. 489.

Ab his multum differunt quae nostro in libro habentur ipsorum itinerum urbes inter se iungentium mensurae, quippe quas miliaris lapidibus inscriptas non opus erat a mathematicis Graecis per longum tempus laboriose indagari.

Constat Romanos, sicubi fines imperii promoverent, castella condere, vias munitas ducere, easque lapidibus miliaris distinguere solitos fuisse. nec dubitari potest quin Romae harum viarum publice structarum index depositus ac subinde una cum ipsarum numero, auctus fuerit. hinc Itinerarium nostrum videtur originem ducere. Agrippam autem, cum orbem terrarum, ut ait Plinius, orbi spectandum propositurus esset, illoque mortuo ipsum Augustum, praeter mathematicorum mensuras, quae regionum formam indicarent, ad urbes iusto intervallo ponendas hanc itinerum notitiam adhibuisse non negaverimus: editum tamen illo tempore Itinerarium nostrum profecto non fuit; neque antiqui auctores usquam eius mentionem faciunt. potest vero ab eodem Antonino editum esse a quo nomen traxit: sed Marco quidem Aurelio Antonino, quem vias Urbis et itinerum diligentissime curasse tradit Iulius Capitolinus^{*)}), non magis quam Piotribuendum videtur: multo enim rectius nomen ad Antoninum Caracallum refertur, quippe cuius pater Septimius Severus vallum illud in quo Britanniae itinera et incipiunt et finiuntur, extruxerit. Severum et Caracallum miliaria vestutate conlapsa restitui iussisse docet lapis inscriptus quem Vindobonae servatum edidit Scipio Maffei in Museo Veronensi p. 241.

Verum post Caracalli tempora, quibus fortasse recensitum et usui publico accommodatum fuit, immutari et augeri Itinerarium non desiit. cuius quam meliores codices nostri recensionem exhibent, ea Diocletiani aetate neque vetustior est neque recentior. nam pagina 330 (Wess.)

^{*)} in eius vitae capite 11; si tamen recte ita legitur.

in omnibus legitur Diocletianopolis; neque antiquiora sunt quae paginis 225 et 226 habentur legionum Ioviae et Herculeae nomina *); nec multo ante Perinthus nomen Heraeae, quod pagina 323 scriptum est, assumpsisse videtur: quae autem Diocletiani aetati est suppar Maximianopolis, eius nomen nonnisi in iunioris classis exemplaribus veteri vocabulo, quod est Porsulis, adscriptum legitur (p. 324 331); item Byzantio Constantinopolis (p. 323).

Sed Constantino Magno recentiora ne in his quidem codicibus inveniuntur: Ostudizo et Antarado appellantur quae inde a Constantio Nice et Constantia dictae sunt; neque Cirta novum Constantinae nomen induit. maioris etiam momenti est, quod nusquam a Constantinopoli velut regni capite itinera exeunt, cum plurima a veteri Roma initium capiant. a Sirmio ad Nicomediam iter protenditur (p. 124 v. 3) neque in Byzantio consistit. recens autem (p. 139) interpositus est versus ille „a Constantinopoli usque Antiochia mpm dcccxxxvi”, ac simili modo paginae 332 recens adscriptum „ab Aulona usque Constantinopolim mpm dccclvi”. eo minus probabile est quod Praefatione ad Tabulam Peutingeranam (p. 7) Mannertus scribit, non ante annum Chr. 364, quo Mesopotamia Persis cesserit, Itinerarium Antonini editum esse. id vero inde colligit, quod Mesopotamia in Itinerario non commemoratur. dixeris potius hanc partem, siquidem in Itinerario perscripta fuerit, aut post amissam Mesopotamiam consulto recisam esse, aut casu deperditam, quemadmodum desiderantur partes Asiae Minoris, Galliae (velut p. 363 v. 3), alia.

Quod a nonnullis medii aevi scriptoribus Itinerarium nostrum pars Cosmographiae Aethici putatur, hoc ideo fit, quia plerique codices, utrumque opus coniungentes, inscripti sunt „Aethicus cum itinerariis suis”.

*) Zosimi hist. III 30.

Non ab uno sed a compluribus neque eodem tempore opus, quale nunc habemus, confectum esse patet ex diversa eius partium forma et indole. inscriptionum ratio non ubique eadem est; modo summa milium indicatur, modo omittitur. mansionum nominibus hic illic adscriptum est colonia, municipium, civitas, castellum, praesidium, vicus, vel in maritimis refugium, plagia; quae multo saepius absunt. quantum ab Aureo monte Viminacium distet, p. 132 et summatim ponitur et praeter morem etiam singillatim: contra nonnunquam sine ullo milium numero nomen mansionis alicuius scriptum est, quae „in medio” proximarum constituta sit. ubi earundem urbium intervalla in diversis itineribus non eadem leguntur, incertum est, librariorum culpa id fiat, an re vera diversae fuerint mensurae, immutato viarum ductu factae. neque mira est in nominibus quae recurrunt scripturae varietas, si variis temporibus scripta sunt. additi interiecto tempore itineris exemplum est quod inscribitur „a Catina Agrigento mansionibus nunc institutis” (p. 94). at non semper novis itineribus idoneus locus repertus est. ubi mansio Contra Pselcis dicta ab Hiera Sycamino decem milia passuum abesse dicitur (p. 164 v. 2), ibi alienum iter interpositum computationem turbat. magis etiam viarum ordo interrumpitur Thraciae itinere inter Aegyptum et Asiam (p. 175) interiecto; quod fortasse rectius pagina 231 poneretur.

Ab initio tamen universum opus sano et circumspecto consilio dispositum et ad communem quasi normam exactum fuisse probabile est. si qua itinera easdem urbes varie coniungunt, recte geminata poni solent. longiori itineri subiungitur alterum quod eodem per compendium ducit. ne eadem itinerum partes repetantur, ad mansiones supra scriptas lector relegatur; et altera via dicitur in alteram intrare. ordo autem itinerum ut a veterum geographorum ratione diversus, ita nequaquam incommodus est. ab extrema Mauretania itur Alexandriam; sequuntur Cor-

sica, Sardinia, Sicilia, Italia; ab urbe Roma pergitur per Pannoniam, Moesiam, Thraciam, Asiam, Syriam, Aegyptum ad Romani imperii claustra Hieran Sycaminon; deinde ab Asia per partes septentrionales pervenitur ad Galliam et Hispaniam, quibus ultima succedit Britannia.

Huic terrestri Itinerario maritimum in antiquis exemplaribus adhaerere solet. cuius prima pars (p. 487-497), urbium maritimarum distantias et traiectionum mensuras amplectens, bene cum illius Itinerarii ratione et indole convenit. altera pars, id est Itinerarium portuum vel positionum navium (p. 497-508), minutam interioris maris particulam comprehendit; quod si absolutum esset opus, maximae profecto molis futurum erat. insulae tertia parte recensentur (p. 508-529), ratione a reliquo Itinerario nonnihil diversa: nam nec distantiae ubique notantur, et quae ex fabulis adiecta sunt, in libro publica auctoritate edito vix requisiveris.

Non mirum est in huiusmodi opere, quod fere totum numeris et urbium nominibus constat, iterum atque iterum excribendo librarios haud raro peccavisse. maximopere geographos vexavit manifesta numerorum depravatio, vel in eo conspicua quod saepissime summa in titulis indicata singulis numeris collectis non respondebat. praecipuam igitur operam in emendandis numeris posuimus; quae res difficillima erat, quod menda non minus summae quam singulis numeris inesse poterant, et alterum non debebat neglecto altero moveri. augebat difficultatem quod earundem mansionum distantia variis locis varie indicabatur. codicum tamen ope longe maximam numerorum partem pristinae sinceritati restituere nobis contigit.

Est ubi verbis recte distinctis ratio numerorum in quibus editores offenderint, emendetur, velut pag. 100 v. 7, ubi mansio quattuor milia passuum ultra Anconam sita significatur. nonnunquam mansiones aliquot interiectae sunt,

quarum numeri perperam summae additi calculum turbabant, ut pag. 92 v. 5, p. 126 v. 5-9, p. 132 v. 3-133 v. 2. in gravissimos errores induxit geographos locus ille p. 242 seq. ubi verba „in medio” quodammodo numeri vicem sustinent. rectam scripturam praebebat codex Parisiensis *D*. eodem pertinent pag. 109 v. 4 et p. 262 v. 1. etiam pag. 301 v. 6-8 apta verborum dispositio omnem difficultatem sustulit.

Ad Hispaniae itinera rectius disponenda meliores codices egregiam nobis operam praestiterunt p. 423 seq. item male repetitum iter Italiae auctore Scorialensi codice eiecimus (post p. 119 v. 2). in Britannia simili librariorum incuria iter bis positum videbatur p. 483. vix opus est monere in Wesselingii pagina 174, quae apud nos non invenitur, nonnisi iter proxime antecedens annotationis loco ex aliis codicibus iterum expressum esse.

Mire sensus turbabatur p. 95 96, ubi refugium et plagia initio sequentium versuum legebantur, quo factum erat ut ipsae Syracusae praestantissimis portubus praeditae nonnisi plagia dicerentur.

Formas nominum variis orbis terrarum regionibus proprias conservare quam ad communem linguae latinae regulam corrigere maluimus. partim eae antiquiores sunt quam elegantiores, partim non tam priscam rusticitatem quam seriorum temporum barbariem redolent. indeclinabilia nomina non raro ponuntur, velut a Tibulas, ubi editores a Tibulis correxerunt, et id genus plurima.

Uberioribus commentariis, quales Wesselingii aetas exigebat, abstinendum duximus, cum nunc in geographiae antiquae compendiis optime coniuncta legantur quae in annotationes discerpere incommodum foret.

Codices meliores quamquam in universum secuti sumus, tamen ibi ab iis recessimus ubi vel aliorum Itinerarii nostri locorum vel scriptorum veterum auctoritas deterioribus libris accederet. rarissime codices omnes deprava-

vati ideoque relinquendi videbantur: sed ne in his quidem libri nostri fides detrimentum passa est, lectionibus codicum religiosissime adscriptis. cuiusvis enim codicis lectio aut in notis ponitur aut, ubi non commemoratur, cum textu prorsus congruit. igitur quod recepimus, id omnium codicum auctoritate nititur quorum discrepantia non annotata est. ex solo Parisiensi *D* tam saepe una vel altera litterula excidit, ut indicando quovis defectu commentarium onerare noluerimus: quae vero ex eo annotavimus, ea prorsus certa sunt. omnino monendum est, quaedam minima et lectori taedium potius quam usum allatura ex commentario nos expunxisse; qualia sunt, utrum maiori littera an minori vocabulum aliquod in exemplaribus incipiat, et quomodo singula verba, antiquitus continue scripta, a recentioribus librariis disiuncta sint; quae raro annotanda duximus. nec ubique compendia scribendi indicanda videbantur. ITEM vel IT in itinerum inscriptionibus habent vetusti codices quos novimus omnes; sed Torinus in apographo Aurelianensi (*FG*) et in editione principe plerumque posuit ITER; quem secutus est Wesselingius, non idonea causa (annot. p. 23) allata. item legendum esse praeter alia suadent p. 106 v. 5, p. 493 v. 12, p. 517 v. 5. at recte p. 317 libri habent „Iter quod ducit” etc., nec raro legitur „Item alio itinere.” milium numeris codices praeponunt $m\bar{p}m$ vel $m\bar{p}$; quod recte per milia plus minus explicari *) vel inde patet quod in Itinerario Hierosolymitano (p. 549) legitur leugas plus minus. quamquam Surita ex auctoritate codicis Scorialensis ubique pro $m\bar{p}m$ scribendum curavit *m. p.*, quod milia passuum interpretatur. eum secutus est Wesselingius, etsi meliora edoctus **). igitur

*) cf. annot. ad pag. (Wess.) 4 v. 1.

**) cf. Wesselingii annot. p. 5. exemplum similis formulae haud rarae praebet lapis anno p. Chr. 465 inscriptus „Alexandria clarissima femina vixit annos plus minus XXV” (Scaligeri de emend. temp. l. V. p. 446 ed. 1629).

in his etiam quò siglo singuli codices quovis in loco usi sint annotare merito supersedimus *).

Veterum codicum lectionibus discrepantiam editionum adiungere incongruum fuisset. ea tamen annotavimus quae contra codicum auctoritatem Wesselingius recepit, ne ignorentur quae per centum fere annos disquisitionum geographicarum quasi fundamenta fuissent.

Codex eleganter quidem scriptus, sed humore ita foedatus est, ut singularum paginarum vix sexta pars, eaque interior et libri dorso proxima, incolumis manserit. in deteriori parte nigrarum litterarum nonnullae, rubrarum plurimae prorsus evanuerunt; vestigia tamen apicum in tractando codice invenire studuimus. exciderunt duo folia p. 452-462 et 512-523 Wess., quae asservantur Londini in Museo Britannico, Bibl. Insunt: Fl. Vegetius; — C. I. Solini polyhistor a Waldaudo clerico scriptus; — Itinerarium Antonini p. 163-435 Wess.

Paginae sunt tripertitae, columnae versuum 28; inscriptiones rubricatae, maximam partem deletae. scriptura est nitida, sed passim aut verba integra aut litterae perierunt; quas singulis punctis indicavimus. numeri permulti a librario omissi. folia ultima membranaceis super agglutinis ita foedata sunt ut partim legi nequeant. de eximii huius codicis indole vide p. xxxiii; eum ipsi excussimus, sed innumeras lacunas temporis iniuria factas non ubique in notis commemoravimus. dubitationes quasdam postea nobis ortas Martinus Hertz codice iterum inspecto humanissime solvit. scripturae specimen tab. II 6.

*) Similiter inscriptus liber ex Aethico excerptus, sed argumenti ab edito prorsus diversi, exstat in codicibus saeculi noni membranaceis Sangallensi 133 8° et Guelferbytano 80^b 8°.

Insunt triginta et unus tractatus varii argumenti (cf. Aniceti Meloti Catal. T. III 4126.), in quibus Itinerarium maritimum, p. 487-508 Wess., quod ex eo codice exscripsimus. scripturae specimen tab. II 11.

F et *G* codices duo fortasse deperditi, quorum apographum Aureliae ad Ligerim (n° 265) adservatur. fuit Guilelmi Prousteau antecessoris Aurelianensis. est liber chartaceus, paginis versuum 19, latis pollices Parisinos 3 lineas 3, altis pollices 5 lineas 2. continet Itinerarium Antonini 101 foliis (7-107); sequitur index foliis 75.

Is liber anno 1511 a Godofredo Torino in usum Philiberti Baboi ex antiquo exemplari (*F*) exscriptus est, additis recentioris cuiusdam codicis (*G*) lectionibus. eosdem codices duos Torinus paulo post expressit in editione principe *), quae, ut fit, hic illic a libro scripto

*) Ita rem se habere, quamvis nec Torini nomen nec Baboi in codice legatur, patet ex his quae sequuntur. folio codicis 3 legitur „Probam et debitam rem facturus visus sum, ornatiss. vir, si beneficiorum quae tam multa in me benignus contulisti, non immemor, hoc Itinerarium manu mea, tibi profecto devota, meliuscule conscriberem. nisi me intempestivitas assidua circumsedisset, et nisi libellus hic in tuum sinum literarum gratissimum umbraculum compositior et honestior velle venire quotidie ad aurem mihi subvagiisset, diligentior proculdubio tu me invenisses. certum habeo (et omnes etiam atque etiam experiuntur) quemcunque hominum pro sua qualitate peculiarem sibi et adseclam habere miseriam: certum inquam habeo, unde modo intempestivitatem illam iuste in me damnare nequeo. libellum autem ipsum ad te pedibus illotis pervenire, concedere potui nunquam, ea pote ratione, quia semper honestis et moribus et virtutibus te exornatum perspexi. diligentia mea tamen si de impromptitudine quoquo modo videtur damnanda, de maturitate fortassis veniet (vel aliquantulum) demum laudanda. hoc ego feci consulto imitatus elephantum, quae gravida (ut vulgus existimat) anno etiam tandem parit decimo. vale. Codex *G* saepius quam pro eius indole credibile est cum *F* consentire videtur, quia haud dubie non omnes eius lectiones apographo codicis *F* a Torino adscriptae sunt. *G* igitur non magnae est auctoritatis:

ferentiam cognoscendam, syllabiculatim, et quidem attente, collatum est. illa vero quae cyaneo linea sunt subtersignata, vetustissimum exemplar praeter alterum continebat. vale.”

In editione autem principe (Parisiis in domo Henrici Stephani 1512 8° min.) haec leguntur.

„Godofredus Torinus Bituricus Philiberto Baboo viro modestissimo s. p. d. itinerarium multis iam annis, vir ornatissime, situ prope modum obsitum quum ab amico michi semper excolendo Christophoro Longuolio, viro sine controversia studiorum omnium bonorum excellentissimo, iam ab hinc quatuor annos commodo primum exscribendum accepissem, unum tibi manu mea scriptum, forma quidem non usque quaque ineptum, ad te ex Parrhisiis in Turoniam mittere venerat in mentem. viro cuius etiam nomini lubens parco, ad te dederam portandum: verum ipse, alii nescio cui, te, me, et sua fide posthabitis satis impudenter dono dedit. labore meo sic ego frustratus, alterum tibi conscribere maturabam, nisi ipse Longuolius, qui exemplar iam olim ex Morinis adportaverat, et michi, ut dixi, commodo dederat, nuper ex Pictavis Parrhisios adveniens monuisset imprimendum curarem.” etc. et paulo post „Torinus lectori salutem. quo melius hoc Itinerario, iucunde lector, possis uti, admonendus es quaecunque virgula miniacea notata deprehendes, ea plura fuisse apud vetus exemplar quam in altero recenti. quae autem in ipso recenti diversa legebantur minutula litera et ipsa quidem rubra suis locis sunt superimpressa.” etc.

quodsi non prorsus attente a Torino excerptus putetur, poterit a Parisiensi nostro *T* non diversus videri (cf. p. Wess. 96 v. 7 et p. 439 v. 3).

In fine codicis Aurelianensis Itinerarium Hierosolymitanum valde decurtatum tribus foliis saeculo xvi vel xvii festinanter descriptum est, eadem manu quae variantes lectiones nonnullas Tabulae Peutingeranae ad marginem Itinerarii Antonini annotavit.

H est codex Itinerarii Hierosolymitani, de quo vide pag. xxxiv.

Hunc codicem, de cuius indole dicetur pag. *xxxiii*, in usum nostrum exscripserunt F. W. Lembke et (inde a p. 64 Wess.) Iulius Kühn. apographo cautius utendum censuimus, cum exempli gratia *l* et *s* litterae permutatae nobis visae sint. scripturae specimen tab. II 10. ex eodem codice Hier. CETERI CODICES.

Praeter hos viginti codices, quibus ad emendandum Antonini Itinerarium usi sumus, alii multi nobis innotuerunt et maximam partem aut a nobis aut ab aliis nostrum in

usum examinati sunt. verum ii non digni videbantur, quorum lectionibus moles commentarii nostri augeretur. sunt autem hi potissimum.

Ex antiquissimo codice Spirensi, de quo infra dicetur, exscripti sunt qui proxime sequuntur septem.

Monacensis Ies. 13, saec. xvi, chartaceus, negligenter scriptus, e bibliotheca Conradi Peutingeri, postea Iesuitarum Augustanorum. inest prior pars codicis Spirensis, i. e. Aethicus; — Itin. Antonini (quod initio mutilum incipit in medio vocabulo ... rationem p. 3 v. 3 Wess.); — Septem montes etc.; — Dicuil; — Annuntiationes provinciarum; — De montibus etc. Romae. eum codicem nullius fere pretii esse cognovimus ex Foeringeri literis.

Romanus Barberinus 809, saec. xvi, membranaceus, forma max. insunt: Aethicus; — Itin. Antonini (quod incipit ... rationem quod mercurius dr. p. 3. v 3 Wess.); — Septem montes? — Dicuil; — Annuntiationes provinciarum; — De montibus etc. Romae; — De rebus bellicis; — Altercatio Hadriani; — Descriptio urbis Romae et Constantinopolis; — De gradibus; — Notitia dignitatum. huius codicis partem Lud. Bethmannus nostrum in usum excerpsit. lectiones conveniunt cum Monac. U, desunt autem quae in U leguntur ad calcem Notitiae dignitatum „Exemplata est haec cosmographia etc.”

Vindobonensis 3102, Salisburg. 18^b, Endlichero cccxxxi, scriptus anno 1529, chartaceus, forma maxima, foliorum 108. insunt: Aethicus; — Itin. Antonini; — Septem montes; — Dicuil; — Annuntiationes prov.; — Excerpta e P. Victore; — De Rebus bellicis; — Altercatio Hadriani; — P. Victor de xiv regionibus urbis Romae; — Descriptio Constantinop. — Notitia dignitatum, cuius in calce „Anno Domini 1484”. in fronte codicis, manu Bernardi Kleselii, episcopi Tridentini „Librum hunc satis incorrectum incorrecte etiam esse iussu nostro tran-

scriptum ex antiquo exemplari reperto in bibliotheca capitulari spirensi, dum ibi essemus cum serenissimo rege Ferdinando etc. in conventu imperiali anno 1529. Bernardus Eps. Trid." ex bibliotheca episcopali Tridentina Vindobonam pervenit. huius codicis Gustavus Parthey excerpsit particulam, cuius lectiones nihil novi afferebant.

Vindobonensis 3403, Salisburg. 18^c, Endlichero cccxxxii, saec. xvi, chartaceus, forma maxima, foliorum 108. eadem continet quae proxime antecedens, cuius apographum est. et hic fuit in bibliotheca episcopali Tridentina.

Venetus Marcianus olim Ambrosii Contareni, postea Thom. Ios. Farsetii, saec. xv, membran. folio. insunt: Aethicus; — Itinerarium Antonini (quod incipit ... rationem quod mercurius dicitur. p. 3 v. 3 Wess.); — Septem montes etc.; — Dicuil; — Annuntiationes provinciarum; — De montibus etc. Romae. haec est prior pars codicis Spirensis. cf. Iac. Morellii biblioteca manoscritta di T. G. Farsetti. Venet. 1771-80. 12^{mo} T. I p. 36, cod. lat. 30; et T. II p. 251. — eiusdem Morellii Bibl. manuscripta gr. et lat. T. I. Bassani 1802. 8. p. 370 et 385. hunc codicem nostra gratia Antonius de Steinbüchel inspexit et particulam eius excerpsit, novi nihil exhibentem.

Canonicianus, i. e. Matthaei Aloysii Canonici, cuius libros Oxoniam migrasse auctor est Blumius Itin. Italici T. I p. 235. saec. xv, membran. folio. Insunt: Aethicus; — Itin. Antonini, quod incipit ... rationem quod mercurius dicitur. p. 3. v. 3 Wess.; — Septem montes; — Dicuil; — Annuntiationes prov.; — De montibus etc. Romae; — De rebus bellicis; — Altercatio Hadriani; — Descriptio Romae et Const.; — De gradibus cognationum; — Notitia dignitatum, cuius in fine „Exemplata est haec cosmographia 1436" etc. (Morelli p. 390); — Demensuratio

provinciarum; — et ab alia manu „Cyriaci Anconitani de septem mundi spectaculis ex Gregorio Nazianzeno gr. et lat.” quamvis in lectionibus omnino cum Spi-rensibus congruat, tamen in primo numero differt, qui est (p. 4. v. 1 Wess.) CCCLXXIII.

Neapolitanus Suritae, de quo Surita pag. 174 editionis suae „bibliothecae Neapolitanorum regum, qui postea Cardinalis de Ursinis fuit, anno MCCCCXXVII exscriptus.” primos versus desiderari dicit Surita, haud dubie usque ad illa „rationem quod mercurius dicitur” p. 3. v. 3 Wess. ubi nunc lateat ignoramus. lectiones eius ex Suritae editione depromptas, quippe incertas et nullius fere auctoritatis, raro adscripsimus, ut pag. 161 162. Wess.

Spirensis. hi septem quos modo recensuimus codices cum nostris *TUV* originem ducunt ab „antiquissimo Spirensi”. is codex, ideo potissimum celebris quod non-nisi ex eius apographis Notitia dignitatum innotuit, nunc deperditus videtur. eum Spira Basileam allatum fuisse anno 1436, testantur Monacensis *V* et Canonicianus; Spirae fuisse medio saeculo sextodecimo patet e Monacensi *U*. frustra ibi quaesitus est ab Nicolao Heinsio a. 1672.

Series opusculorum, quae Spirensi codice continebantur, in duas dividitur partes; sunt autem hae.

I Aethicus; — Itinerarium Antonini (cui adhaerent „Septem montes” et „Nomina aquarum”); — Dicuil; — Annotationes provinciarum; — De montibus portis et viis Romae.

II De rebus bellicis (cum undecim tractatibus); — Altercatio Hadriani; — Descriptio Romae et Constantinopolis; — De gradibus cognationum; — Notitia dignitatum orientis et occidentis.

Haec in plurimis de quibus diximus Spirensis apographis insunt: priorem tantum partem habent Mona-

censis Ies. 13 et Venetus Farsetii; alteram partem ante priorem ponit Florentinus *Q* nonnullis omissis.

Iis quae ex antiquo Spirensi codice descripta sunt, in Canoniciano et Monacensi *V* (ut et in Matritensi *O* et Florentino *Q*) adhaeret „Dimensuratio provinciarum quae non erat in praecedenti codice”. praeterea in Monacensi *V* ab eadem manu, in Canoniciano ab alia adiectum est Cyriaci Anconitani opusculum graecum de septem mundi spectaculis e Gregorio Nazianzeno sumptum.

Anni quibus Spirensis codex exscriptus est nobis innotuerunt hi:

1427 ex Neapolitano Suritae

1436 ex Canoniciano et Monacensi *V*

1484 ex fine Vindobonensium 3102 et 3103 secundum Endlicherum p. 232 Catalogi

1529 ex initio Vindobonensis 3102

1542-1551 ex Monacensi *U*.

Vindobonensis Suppl. 14, saeculi xv, membranaceus, foliis 119 latis pollices Parisinos 5 lineas 4, altis pollices 7 lineas 6, paginis in Itinerario bipertitis, columnis versuum 21. inscriptiones litteris maiusculis rubricatis exaratae. in Italia nitidissime scriptus, e bibliotheca Olomucensi in Caes. Vindobonensem transmissus anno 1837; quondam (1670) collegii Societatis Iesu Brunae.

Insunt: Aethicus; — Itin. Antonini; — Nomina aquarum; — P. Victor de regionibus urbis; — Dicuil; — Annunciationes prov. — hunc codicem cum editione Wesselingiana contulit G. Partheius et scripturae specimen confecit. convenit cum Paris. *B*; versus in *B* omissos non habet; sed mendis propriis scatet, quare ex commentario nostro eum exclusimus.

Neapolitanus Borbonicus. C. Iannelli Catal. Bibl. latin. manuscr. Mus. Borbon. Neapoli. 1827. 4. p. 126:

CLXXII (bis) IV. D. 22 bis. codex chartaceus in folio, accurate sed non una manu descriptus saec. xv.

Insunt: Aethicus; — Descriptio urbis Romae; — „Itinerarium Antonii Augusti”: numeri adpositi sunt Arabicis notis; — Petri Cassinensis Palaest. chorographia; — Liber dignitatum Romani Imperii; — Martiani Capellae lib. vi; — Pomponius Mela: ad calcem „Finis. Pomponii Mellae Cosmographiae liber explicit III Kal. Martii 1474 per Arnaldum de Stecans (sic) de Brixella; — Annotatio urbium atque provinc. Gallic.; — Summa decr. orbis terrae: ad calcem „Finis die 6 Aprilis 1484 per Arnaldum de Steccans (sic) de Bruxella. Neapoli.”

Monacensis Ies. 14, chartaceus, anni 1514, negligenter scriptus, in folio. fuit Conradi Peutingeri, postea Iesuitarum Augustanorum. post Aethicum habet Itin. Antonini. partem huius codicis in usum nostrum excerpserat Föringerus. in multis discrepat a codicibus nostris, sed tantopere mendosus est ut fidem nullam mereatur, quare etiam hoc codice abstinuimus.

Vindobonensis 3222, rec. 1872, Endlichero cccxxx, chartaceus, saeculi xvi, in quarto, foliorum 182.

Insunt: Emanuelis Lusitaniae regis epistole ad Iulium anni 1507; — Aethicus (apographum vetusti codicis Vind. L, Cuspiniani manu ut videtur confectum); — Itinerarium Antonini (item codicis L apographum); — Remigii Antisiod. glossae in Martianum Capellam.

Simlerus in epistola dedicatoria „Ioannes Cuspinianus scribit, se habere Itinerarium vetustissimum incerti auctoris, quod Iulio Caesari adscribatur”.

Sangallensis, Bibl. Monast. n. 663 (p. 31 sqq.), saeculo xvi a Scudio confectus, qui modo editionem Itinerarii principem, modo alios scriptores, modo coniecturas suas secutus est. Simlerus hunc librum antiqui codicis apographum esse ratus ad editionem suam adhibuit. tunc in-

teger erat, nunc in principio mancus incipit: Aegyptus Thebaica, Coptos etc. p. 165 Wess. Itinerarium maritimum sequuntur Liber vetus prov. Galliae; — Vibius Sequester; — Liber noticiarum dignitatum; — Excerpta ex Itinerario quae ad Galliam spectant. huius libri a Bethmanno nostrum in usum inspecti partem cum editione Suritae contulit I. I. Bernetus, parochus et bibliothecarius civitatis Sangallensis.

Romanus Ottobonianus 2056, saec. xv exeuntis, chartaceus. insunt: Higinius de stellis; — Asiae descriptio; — Lexicon quoddam geographicum ex Caesare; — folio 101 „Incipit liber qui vocatur Itinerarius prouinciarum omnium Antonii Augusti. in primis prouinciae Africae miliaria. a tingi Mauretanie” etc., unde quaedam huius exemplaris cum veteri Blandiniano affinitas cognoscitur. in fine „Explicit liber qui Itinerarius uocatur corruptus per totum”. sequitur Itinerarium maritimum cum Itinerario portuum etc.; — Herodotus de Homeri genere et Plutarchus de Homero latine; — Vita Pii II auctore Platina et alia anonyma; — Carmina de Pio II; — Cribelli Apologeticus ad Franciscum Philelphum. hunc codicem fortasse a Montefalconio (Bibl. bibl. I. p. 189 D) memoratum nobis indicavit Bethmannus, a nobis rogatus inspexit H. Brunn.

Valentinus et Caesaraugustanus. uterque ab Andrea Schotto excussus, qui in praefatione ad Ortelium ita „Equidem duo vetera nactus exempla, diligenter quoque comparavi. alterum Valentia Edetanorum amicitiae gratia Pe. Ioan. Nunnesius, summus nostra aetate et rhetor et philosophus, ad me misit; alterum Hieron. Blancus (qui Suritae in historiae Arragonicae tractatione succedens annales et ipse latine perscripsit) utendum dedit”. lectiones a Schotto in calce editionis allatae haud magni momenti sunt: Caesaraugustanus saepe congruit cum Aurelianensi F. et Valentinum et

Caesaraugustanum bello Gallico (a. 1809 et 1811) interiisse probabile est (Haenelii Catal. mss. p. 999 et 1008).

Libri Sigonii et Hieron. Pauli. quas idem Schottus lectiones ex Caroli Sigonii Indice Historiarum regni Italiae excerpsit, eae codicis manu scripti auctoritatem non habent. nec magis illae quas in Hispaniae itineribus illustrandis Surita ex libro nunc rarissimo affert, cui titulus: Hieronymi Pauli Barcinonensis ad R. D. Rodericum Ep̄m Portuen. Cardinalem Valentinū..... de fluminibus et mōtibus Hispaniarum libellus. accedunt I. de priscis Hispaniae Episcopatibus et eorum terminis. II. excerpta ex Itinerario Antonini Pii et Theodosii de Hispaniis. III. excerpta a Provinciali antiquo Eccl. Rom. de Episcopatibus Hispaniae. s. l. et a. (saeculi xv) 4^{to} min. eae lectiones cum Matritensi *O* congruere solent, quem probabile est Paulum expressisse, nonnullis mutatis: nam recte de eo Surita p. 536 „arbitror non ex vetustis libris, sed de suo duo milliaria adiecisse”.

Rogerus Gale p. iv praefationis ad Thomae Gale editionem Itinerarii Britanniarum (Londini 1709. 4) scribit „penes me est in pergamenis pars illa Itinerarii quae Africam Sardiniam Siciliam Italiamque peragrat”. idem de lectionibus a patre adhibitis „debentur aliae celeberrimo Bentleyo, et sunt ex codice Atrebatensi desumptae”. eae autem plerumque cum Aurelianensi *F* i. e. Blandiniano consentiunt.

INCERTORUM CODICUM EXCERPTA.

Romanus Vaticanus 3135, saeculi xv, chartaceus 8^{vo}, negligenter scriptus, praeter varia metrica habet nonnulla geographica, in quibus Itinera Italica ex Itinerario Antonini excerpta. H. Brunn nostrum in usum particulam eius codicis descripsit, quae nimis depravatas exhibet lectiones.

Lugduno Batavorum I. Geelius nobis misit exemplar Vosianum editionis Coloniensis, duorum codicum excerptis auctum. hos codices Wesselingius Parisienses suspicatur, sed nonnisi alter cum Parisiensi *B* hic illic consentit. indidem nobis subministratum exemplar Lugdunense cum notis Iacobi Gronovii manu scriptis multo minoris pretii est. similem librum Wesselingio misit I. A. Fabricius. nec maiorem usum nobis, ex ipsis fontibus haurire consuetis, afferre poterant excerpta Oxoniensia Cantabrigiensia Dublinensia Londinensia, quae in Catalogis Bibl. Cottonianae (Oxon. 1696), mss. Angliae (1697), Bibl. Harleianae (1808) recensentur.

Edwardi Bernardi liber alter nonnisi coniecturas habet (Gale praef. p. V), alter in Britanniarum itinere a Galeo adhibitus quam fidem mereat incertum est. excerpta denique ex Nicolai Cusani schedis, quorum apographum Wesselingius habuit, saepe cum nostris *MOQTUV* faciunt, „alter Cusani” nonnunquam cum Parisiensi *B*.

DE CODICUM INDOLE.

Omnes quos novimus codices (sunt autem quadraginta ferme), cum quos in commentarium nostrum recepimus, tum ii quibus abstinuimus, quattuor potissimum classes constituunt, exceptis ambiguis quibusdam.

In prima classe ponendi sunt Vindobonensis *L* (cum Cuspiniani apographo), Vaticanus *N* et Remensis *J*.

Antiquissimus est Vindobonensis *L*, saeculi VIII, isque optimae notae, maiorem etiam usum allaturus, nisi in milium numeris passim a secunda manu refictus esset. artissime cum eo cohaerent Vaticanus *N* saeculi XIII ineuntis et Remensis *J* anni 1417. emendationes nonnullas secundae manus ex Vindobonensi *L* recepit Remensis *J*, non recepit Vaticanus *N*, velut p. 346 v. 4; item ex p. 374 v. 7 collegeris, Remensem ipsius Vindobonensis apographum esse, verum p. 292-300 Remensis 51 versus habet qui et Vindobonensi et Vaticano desunt; itaque ne ex Vaticano

quidem solo fluxit (cf. p. 81 v. 1). Remensis *J* Itinerarium maritimum habet, quo *L* et *N* carent. itinera duo, quae in Vindobonensi desiderantur (p. 427-431), alio loco habet Vaticanus, alio Remensis; uterque omittit quae p. 270 v. 1 a secunda manu Vindobonensi inter versus addita sunt. ex his quae diximus videtur patere, ne Vaticanum quidem ex solo Vindobonensi exscriptum esse. ceterum τ siglum p. 32 v. 4 ex margine Vindobonensis in contextum Vaticani transiit.

Alteram classem occupat solus Scorialensis *P*, Vindobonensis *L* aetati suppar. lectiones exhibet plerumque optimas, raro perversas; saepe recedit ab reliquis fere omnibus, quorum nullus ab eo originem ducit. discrepantiae exemplum est quod p. 21 v. 2 (Wess.) in *P* legitur „Tuniza mp xv”, cum reliqui omnes habeant „Nalpotes mpm xl”.

In tertia classe collocandus est Parisiensis *D*, non minus singularis ac laude dignus, etsi paulo recentior situque depravatus et mancus. modo ab omnibus differt, modo solus cum Scorialensi *P* consentit, velut p. 220 v. 4. recte distinguit versus ab reliquis male coniunctos p. 242-248.

PD et in plurimis etiam *L*, quem sequi solent *JN*, priorem Itinerarii recensionem exhibent, in qua nomina urbium Diocletiano posteriora non leguntur; reliqui omnes addita habent quaedam Constantini Magni aetate non antiquiora.

DJLNP ubi inter se consentiunt, maximae sunt auctoritatis nec temere relinquendi.

Quartam classem constituunt, eamque minus praestantem, Dresdensis *M* (deperditi Spirensis simillimus, et omnibus illius apographis longe antiquior) et magna codicis Spirensis familia, i. e. Matritensis *O*, Florentinus *Q*, et quae in medio vocabulo „... rationem” incipiunt recentia libri Spirensis apographa, Aurelianensis *G*, Canonicianus, Monacenses *UV* et Ies. 13, Neapolitanus Suritae, Parisiensis *T*, Romanus Barberinus 809, Venetus Marcianus, Vindobonenses 3102 et 3103. horum igitur *MOQ* initio in-

tegri, ceteri mutili sunt; sed *OQ* non sunt ex solo *M* descripti, cum habeant paginae 82 versum 3, qui in *M* et Spirensis apographis deest. ceterum huius classis codices, alioquin plerumque inter se consentientes, in primo milium numero (p. 4 v. 1 Wess.) mire dissentiunt: nam cccclxxiiii habent *OQ*, ccclxxiiii Canonicianus, clxxiiii *MTUV* et Venetus Marcianus, cxxix Neapolitanus Suritae; unde colligere licet, vitium antiqui Spirensis ad hunc etiam numerum pertinuisse.

Ex iis qui minus certae indolis sunt quam ut quattuor illis classibus accenseantur, Parisienses *AC* nonnumquam cum Spirensi consentiunt; *F*, satis probus, asseclas habet Caesaraugustanum et, si ex paucis iudicare licet, Ottobonianum 2056 et Atrebatensem Bentleii. nonnumquam cum *F* convenit Parisiensis *B*, cui Guelferbytanus *K* (cf. p. 44 v. 5) et Vindobonensis Suppl. 14 sese adiungunt. satis bonae indolis est Florentinus *R*, nec spernendus Lugduno Batavus *S*, at multo minoris pretii Parisiensis *E*, qui nonnisi Itinerarium maritimum exhibet.

ITINERARIUM HIEROSOLYMITANUM.

Itinerarii Hierosolymitani sive Burdigalensis unum novimus vetustum codicem Pithoeanum; quae alia nominantur manu scripta exemplaria nihili sunt: Aurelianense (ad calcem codicis 265, nostri *FG*) totum excussimus; est recens Pithoeani apographum, hic illic de coniectura correctum. indidem fluxerunt excerpta Vossiana, a Wesselingio p. 545 memorata. quae autem in Montefalconii Bibliotheca bibliothecarum t. I p. 81 93 recensentur duo exemplaria, ea in Vaticanam bibliotheca requirenda curavimus: non esse reperta renuntiavit H. Brunn.

Pithoeanus codex, nobis *H*, membranaceus saeculi viii, est pars Parisiensis Regii 4808, quem inter codices Itinerarii Antonini *C* littera notatum supra descripsimus. itinerarium Hierosolymitanum foliis septem, latis pollices Pa-

risinos 7 lineas 2, altis pollices 10 lineas 2, non eleganter quidem sed accurate scriptum est. eius specimen tab. II 3. paginae plurimae bipertitae, columnae versuum 31. rubrica praeter libri inscriptionem nulla est. ex hoc codice Itinerarium Hierosolymitanum primus edidit A. Schottus cum Itinerario Antonini, Coloniae 1600. 8. p. 135-160. quam enim Wesselingius p. 545 editionem Pithoei primam dicit, ea nunquam prodit. *)

Lectioes codicis a nobis excussi accurate expressimus, etiam ubi aut librarii incuriam aut senioris aevi depravatam latinitatem produnt, velut „haec fons” p. 592, et „ascenduntur gradi” p. 587 et similia. alia quae magis etiam immutata in editis erant, ad codicis auctoritatem correximus. pag. 571 quod legebatur „Dalmatio et Dalmaticei Zenofilo cons.”, id male habuit eruditos; scilicet id quod fuerat corrigendum simul cum correcto in editiones irrepperat. pag. 596 legebatur „ad latus est vas fictile Helisaei”, quasi iuxta fontem illud vas positum fuerit. in talibus nos ipsum codicem secuti editionum discrepantiam siluimus. corrigi nomina vitiose scripta facile poterant: verum imperiti librarii sphalmata quis ab iis distinguat quae ab auctore profecta sunt non magis perito. quin plurima ipsi aetati debentur.

Conscriptum enim est Itinerarium anno p. C. 333 ab homine christiano in usum eorum qui a remota Aquitania urbem Hierusalem, a Constantino Magno basilicis tunc exornari coeptam, adire cupiebant. unde non tantum in eo usum nobis praebet, quod obscuriores etiam mutationes nominat, in magno Itinerario Antonini publice confecto praeteritas, sed etiam quod sanctorum locorum antiquissimam exhibet descriptionem.

In indice quam accuratissime confecto, quod opus quam operosum fuit tam utile fore speramus, singulis mansionibus recentia vocabula adscripsimus, auctorum, ubi necesse videbatur, adiectis nominibus. quae nomina ad haec potissimum opera referuntur.
